Anil Can Baykal

Software engineer with production-proven experience in development of Mobile applications & backends on different platforms. Built small/mid sized software teams, managed using agile methods and delivered solid projects.

SKILLS

Mobile	Cloud	Backend	Data
Master	Master	Proven	Good
ios (good) android (competent)	amazon ec2 google app engine vmware	j2ee tomcat glassfish jetty dropwizard python tornado	mysql google bigquery google datastore mongo

EXPERIENCE (5)

CTO/Co-founder | Öde Al

October 2013 - Current

Co-founded and developed Turkey's first mobile payment platform, Ödeal İşyerim. Ödeal İşyerim allows registered businesses to accept credit card payments with the free app without having any hidden costs. Built the payment system using Google App Engine & Amazon Web Services and mvp mobile applications. Currently recruiting a small team and leading the development on iOS application

- Startup Istanbul 2014 Finalist
- LeWeb 2014 Startup Finalist
- Received the highest first round investment in Turkey [<http://webrazzi.com/2015/03/11/sanko-online-mobil-odeme-sistemi-odeal-yatirim/>]

Senior Software Developer/Co-founder | Mobilike / Nomad Commerce

May 2011 - June 2013

Joined Mobilike, one of the leading Mobile Advertising Company in Turkey, as the Lead Software Engineer for they manage 80+ mobile applications developed by various 3rd parties. Coordinated the development/integration process and also developed an advertising and analytics SDK, Makina (later rebranded to 'seamless'). After working with many 3rd party applications, developed SaaS framework Handsome (similar to Parse) which solves common problems in mobile application development. A new company called 'Nomad Commerce' was created which is focused on building Handsome backed-up mobile applications. Recruited and lead a small team of software developers who successfully developed two commercial applications (Yellow Medya and Cobone) on three platforms (iOS, Android, WinPhone) and a quiz application (Know now!) using Handsome framework

<http://mobilike.com>

- Makina ad framework -- later renamed to `seamless` [<http://goseamless.com>]
- Know Now! quizz iOS app
- Handsome Framework -- later open sourced under the name Lembas and as a commercial product Cortex [<http://nomadcommerce.com/#cortex>]
- Yellow Pages Turkey iOS/Android app

Senior Software Developer | Pozitron (acquired by Monetise in 2014)

October 2007 - May 2011

Hired as developer #2 at Pozitron and worked on the inhouse J2ME framework which -still- empowers İşCep, Bilyoner on low end devices. Developed server side development with a project that provisions and distribution of mobile applications to java based devices. Moved to iOS platform development in 2008 and published first mobile banking application İşCep. With the growth at Pozitron, became the Lead Developer in most the projects (Biletix, Bilyoner, Thy..) and continued developing for iOS (ProDG, Finanscep). Responsibilities also included recruiting, software architecture for clients and inhouse framework research&development.

<http://pozitron.com>

- İşCep iPhone app for İş Bankası, Turkey's biggest bank
- THY iPhone app for Turkish Airlines
- Finanscep iPhone app for Finansbank
- Biletix iPhone app for Ticketmaster Turkey
- Bilyoner iPhone app for Bilyoner, Turkey's biggest betting site
